Comments for ECON222705_2021F_Discussion Group: Econometric Methods - Kritika Goel

What are the strengths of this course?

Comments
Lecture notes are immensely useful.
Knowledgeable professor.
good information on Stata
Builds on the STATA lab from stats.
The course is effective in that it provides good examples of how our code should look.
Clear explanations
This course presented the material very clearly and the goals for the course were straightforward.
ok

How could the instructor improve the course?

Comments
Less focus on code and more on intuition. But the instructor did want needed to be done.
N/A
not sure
N/A
Add additional optional questions on canvas.
The course covered a lot of essential material, but I think it could have included more work that included our own analysis of datasets rather than the very step-by-step process in our problem sets.
N/A
it's very good already.

Would you recommend this course to other students, majors, etc.? Why or why not?

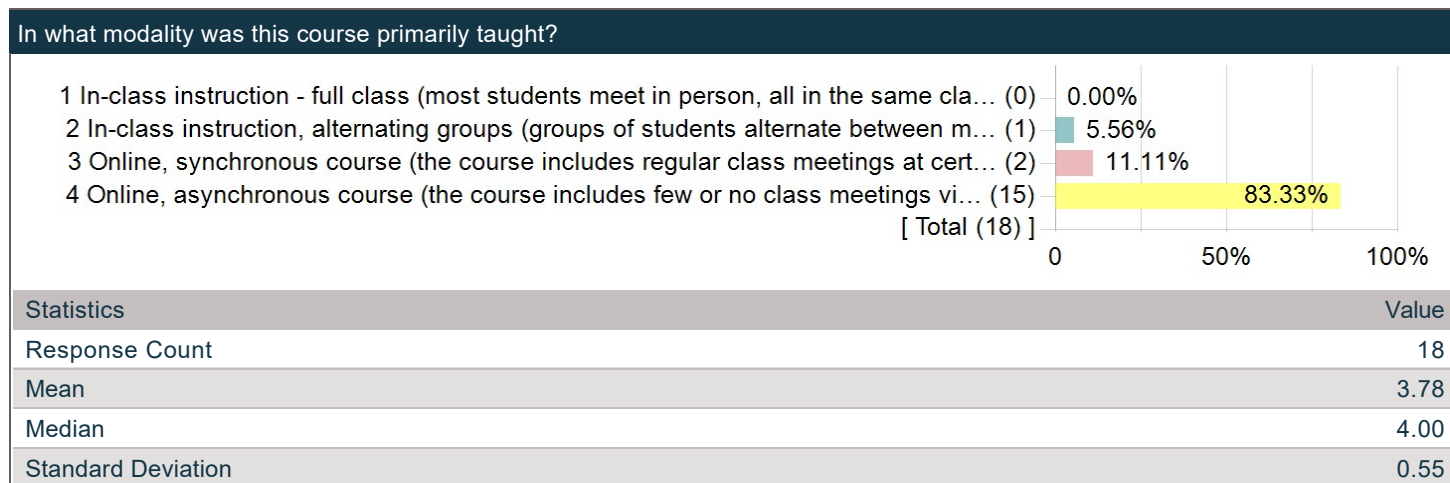

Comments
Yes. You learn how to use stata well.
Yes, because of Prof. Goel.
yea its useful skills
Recommend it to econ majors
I would recommend this as it is required, but I would recommend Kritika as she is one of the best.
Yes
I would recommend this course for anyone interested in any sort of analytics because the skills learned in this course are very applicable in that regard.
Yes. I think learning STATA is very applicable and useful.
yes, very clear and well organized

Additional Comments:

Fall 2020 Questions

In what modality was this course primarily taught?

In this course, how effective was the modality in helping you learn?

Please explain why you think the course modality was effective or ineffective in helping you learn.

Comments
There was no reason to spent 1 hour or more a week in person to learn this material. Every lecture could be learned in 20 mins reading the pdf lecture notes.
It was effective because it allowed us to learn at our time, and, recording the lessons allows one to pause and rewind, which is quite helpful for when one needs to reinforce the material.
hard to focus
STATA lab is very straightforward. Watch the lecture, follow on STATA, then do the quiz or homework.
I do not like the lack of structure of an asynchronous course, especially one for my major. It was not as effective as it would be if it were synchronous or in person.
I could learn all the material
For my learning style, I like the flexibility to learn things at my own pace and on my own time, so asynchronous lectures helped.
I was able to meet with my instructor out of class if I had questions.
I think the instructor does things very clearly, and the course is well organized.
